Summary

Developer specializing in scalable, maintainable web applications and production-ready web solutions. Build and ship modular **React**, **Next JS**, **Angular** interfaces, predictable state management with **Redux**, **NgRx** real-time updates via **Web Sockets**, and secure **RESTful APIs** backed by well-designed relational **databases**, with hands-on experience delivering **CRM** features for daily business operations. Core stack: **React**, **Next.js**, **Angular**, **TypeScript**, **JavaScript**, **Redux**, **NgRx**, **Tailwind CSS**, **Nest JS**, **Node.js**, **Express.js**, **PHP**, **Laravel**, **PostgreSQL / SQL**, **Git** and **Linux**

Experience

Frontend Engineer | LTD Gegmio | February 2026 – Present (Remote)

Enterprise CRM platform

- Delivered modular client-side CRM features for daily business operations using **React**, **TypeScript**, **Tailwind CSS** and **Shadcn UI**
- Engineered predictable state management across core modules with **Redux** in a unidirectional **Flux** architecture
- Integrated real-time data updates utilizing **WebSockets / SignalR**, significantly reducing manual page refreshes and stale-data reports
- Reduced request-logic duplication and API defects by centralizing **RESTful API** calls in typed **Axios** services, and shortened handoffs by turning **Figma** prototypes into responsive, accessible components
- **Implemented Role-Based Access Control (RBAC)** across multi-tenant admin dashboards to secure sensitive operational data based on user permissions
- **Shortened design-to-production handoffs** by converting **Figma** prototypes into accessible UI components and participating actively in peer code reviews (PRs)

Trainee — ITransition | March 2025 – May 2025 (Remote)

- Shipped an end-to-end full-stack web application, developing dynamic UI with **React / TypeScript** and robust backend endpoints with **NestJS**, **PHP / Laravel**, and **PostgreSQL**
- Designed and deployed secure, validated **RESTful API** endpoints using **NestJS**, **Node.js**, and **Express.js** framework patterns
- Modeled and optimized relational database schemas to maintain data integrity across core entities
- Successfully completed the **full-stack** engineering traineeship and defended a production-ready web application before the evaluation board

Education

- **B.S. in Computer Science** | European University | September 2023 – July 2027
- **Exchange Semester, Computer Technology and Computer Engineering** | Universidad de Málaga, Spain | February 2026 – July 2026
